

HWH[®] Precision Leveling System

Designed for Vehicles Requiring Precision Leveling Within a .05 Degree Tolerance

**Adjustable Metering Valve to accurately level vehicle.
(Allows tailoring to different configurations)**

**Level Sensor
Precision made to make setting the sensor easy**

**Mechanical Override
(for emergency operation)**

**Control Valves are directly mounted to jack.
(No hose connection)**

**Touch Panel
Easy-to-use controller for true automatic operation**

Includes the following features...

- Precise, consistent leveling within .05 degrees
- Hydraulic straight-acting, power-extend/power-retract jacks
- Jacks range from 12,000 to 24,000 lb. capacity and up to 24 inch stroke
- Corrosion-protected rods and large footpads for maximum life and stability
- One-touch, automatic, pushbutton controller is easy to operate.
- Controller can be used manually to hook and unhook trailer, then touch one autolevel button to automatically level trailer within .05 degrees
